City of Kansas City Human Relations Department

Date: December 21, 2012
 To: Construction Workforce Board
 From: Phillip Yelder, Director
 Subject: October 2012 Narrative for the Construction Workforce Reports

Construction Workforce Action Update:

The Construction Workforce ordinance applies to all construction contracts the City entered into after September 1, 2007 that will require more than 800 construction labor hours and with an estimated cost that exceeds \$324,000. In addition, on December 15, 2009 the Statutory Agencies adopted the City's construction workforce reporting as embodied in Ordinance No. 070504.

The established Company Wide goals for minority and female workers are 10 percent and 2 percent respectively. The hours for the month of October 2012 are depicted in the titled October 2012 Detail Report. This report consists of the KCMO City projects followed by the Statutory Agencies' reports. Workforce hour totals for the month of October 2012 are as follows:

	Total	Minority	%	Female	%	KCMO	%
Companywide prime	357,023	46,657	13.07%	12,393	3.47%	17,890	5.01%

Human Relations Department Workforce Report

October 2012 Craft Total

Each month, contractors and their subs are required to submit at least two workforce reports: *companywide prime or companywide subcontractor report and a project specific monthly workforce report. The contractor's companywide data for construction project combines their work across the Metropolitan Statistical Area. Their subcontractors do as well. HRD compiles this data in a number of ways.*

In this report, you will find four attached sheets. The sheets are a tabulation of every report submitted for the month of October. Going down the left hand column is a breakdown of scopes of work by both craft and skill level. The rows across the top break the workers down by gender and ethnicity. The very last column tabulates KCMO residents.

At the bottom of each page, you will find the total numbers for each of the genders and ethnicities. It is from here that we gather the data used in the Director's Narrative and repeated below for your convenience.

	Total	Minority	%	Female	%	KCMO	%
Companywide prime	357,023	46,657	13.07%	12,393	3.47%	17,890	5.01%

Construction Workforce Companywide & Project specific detail reports

Report explanation:

Each month, contractors and their subs are required to submit two individual reports. A project specific report and a companywide report. The companywide report contains data for all worked performed on any construction projects across the Metropolitan Statistical Area. This information is then submitted to HRD, who compiles the data in a number of ways.

In this report you will find the detailed breakdown of workforce numbers generated by the contractors. Each page is double sided. The front page gives the project information as well as a tabulation of total hours, minority hours, female hours and KCMO resident hours. Contractors are required to maintain a level of 10% minority and 2% female companywide hours throughout the lifetime of their projects. The back of each page is the same report, but further broken down into specific ethnicities and genders. Every report listed is available in even further detail through our online B2GNow system which is where the contractors submit each month's reports.

Because the workforce goals for contractors are for the lifetime of the project, a contractor's minority workforce October fall below the recommended goals, with the intent of meeting those goals prior to the contract expiration. HRD continually monitors the situation and if this becomes a consistent pattern, contractors will be asked to clarify what steps they are taking to either meet the workforce goals or show good faith efforts as to why those goals were unobtainable.

October analysis:

In October, there were 29 prime contractors to report companywide hours. All of them reported with the exception of Amino Brothers. Primes and subcontractors continually struggle to meet the 10% minimum threshold for minority workers and 2% for females. 10 prime contractors met the 10% minimum threshold for minority workers and 2% minimum threshold for female workers. Only 4 projects had subcontractor's percentages that met both thresholds. Sixteen prime contractors exceeded the minority participation, some exhibiting partial female compliance, but not what is required under the ordinance. The total contract dollar value of the projects monitored through the city is over \$290 million.

CONSTRUCTION WORKFORCE STATUTORY AGENCY DETAIL REPORT

Report explanation:

Statutory agencies are the quasi-governmental organizations that provide tax abatement or other assistance through the construction project. As of December 2009, HRD monitors the workforce component of projects originating from these agencies. HRD is currently monitoring projects from TIF, LCRA and PIEA.

Each month, contractors and their subs are required to submit their project specific numbers and a companywide report. The majority of the developers are submitting their numbers through the B2GNow on-line system however, Hunt Midwest continues to submit their reports via email, as their project's started before the inception of the program and were not grandfathered in. Many of their projects are close to completion and Hunt Midwest has been notified that future projects will be monitored through the B2GNow system. The reporting consist of at least four workforce reports: companywide prime, companywide subcontractor, project specific prime and project specific subcontractor. The contractors turn in a report on their companywide data for construction projects across the Metropolitan Statistical Area. Their subcontractors do as well

In this report you will find the detailed breakdown of workforce numbers generated by the contractors. Contractors are required to maintain a level of 10% minority and 2% female companywide hours throughout the lifetime of their projects. Because the workforce goals for contractors are for the lifetime of the project, a contractor's minority workforce October fall below the recommended goals, with the intent of meeting those goals prior to the contract expiration. HRD continually monitors the situation and if this becomes a consistent pattern, contractors will be asked to clarify what steps they are taking to either meet the workforce goals or show good faith efforts as to why those goals were unobtainable.

October analysis:

In October, there were 8 individual developers reporting workforce data. Five of them reported on the City's B2GNow online reporting system. Camron Place began reporting on line during the month of November; therefore there are no numbers to share in this month's report. The Pendergast Project is currently in the bidding process. Developers for the Briarcliff Mariott project and the Metro Plaza Shopping Center have both, completed their projects. These project numbers can be found on a separate tab in the Detail Report.

The total contract dollar value of for the projects monitored is \$376,213,271.00..

Human Relations Department Workforce Report

October 2012

Cumulative Workforce Monthly Report

Report explanation:

In this report you will find the cumulative totals of all the contractor reports for companywide and project specific numbers. The top section is a tally of the corresponding entry for every previous month. It's usually a one year running total. The lower sections show the most recent month or two months worth of data. The electronic version has every month's totals available on it but, due to paper considerations, only the document's first page is prepared in the printed version. The full document is available upon request.

October's Report:

In the section titled October 2012, you will find the same numbers as were generated for the October Craft report. The top sections are those corresponding numbers from October 2011 through October 2012. In total there have been approximately 7.6 million companywide hours and 3.5 million project specific hours reported over the previous year. For the month of October approximately 85.01% of the work was done by Caucasian males, 12.72% performed by minorities, and 2.70 % by female. In conclusion, the overall contractor's performed 2.72% above their workforce goals for minorities and .70% above goals for females. These hours are somewhat reflective of the completion of the NNSA project. KCMO resident hours consisted of 9.71% of hours reported.
