REDUCE CRIME

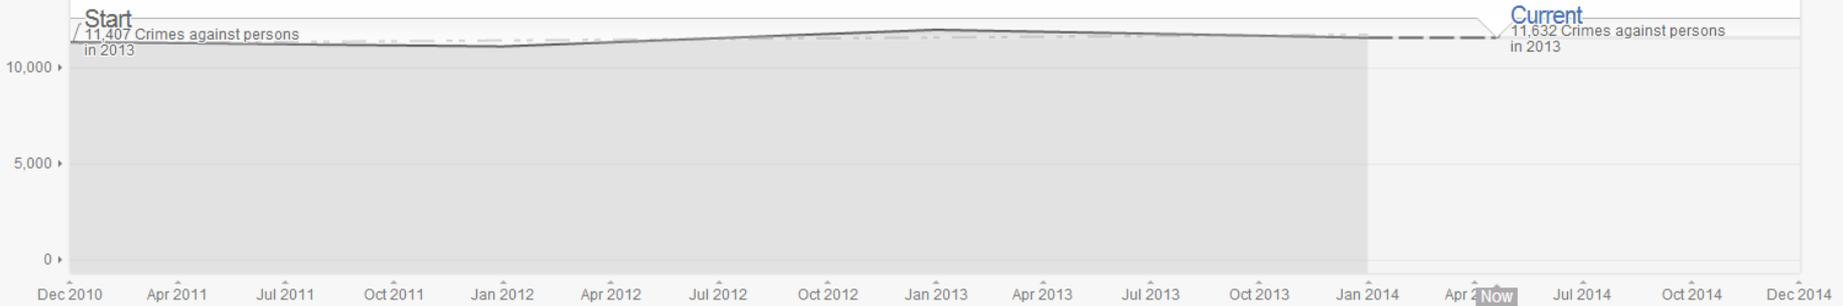

CRIMES AGAINST PERSONS AND PROPERTY

CRIMES AGAINST PERSONS

The key measurement for this priority is the number of violent crimes, otherwise known as crimes against persons. The target for this priority is to decrease the number of crimes against persons by 5% from fiscal year 2013-14 (which ends April 30, 2014) to fiscal year 2014-15 (which ends April 30, 2015). [Explore the data](#)

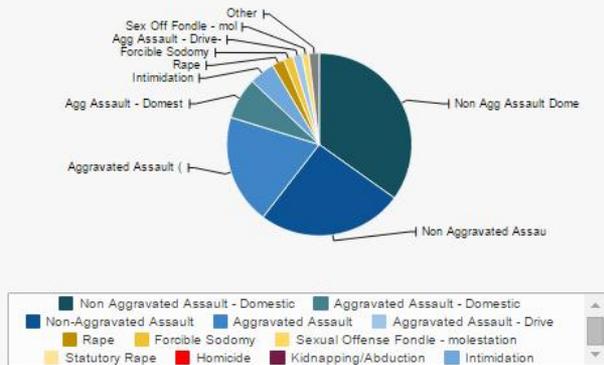

11,632 Crimes against persons in 2013
Current as of Dec 2013

CRIMES AGAINST PERSONS (2014 YEAR-TO-DATE)

Crimes Against Persons by Type

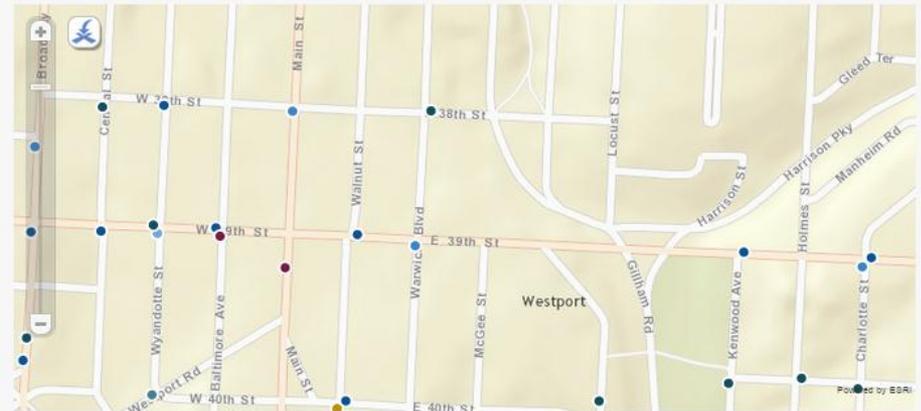

Crimes against persons are broken down under the NIBRS into different types of assaults, sexual crimes and murders. The chart below shows this breakdown for calendar year 2014 year-to-date. *(data updated weekly)*

Explore the data

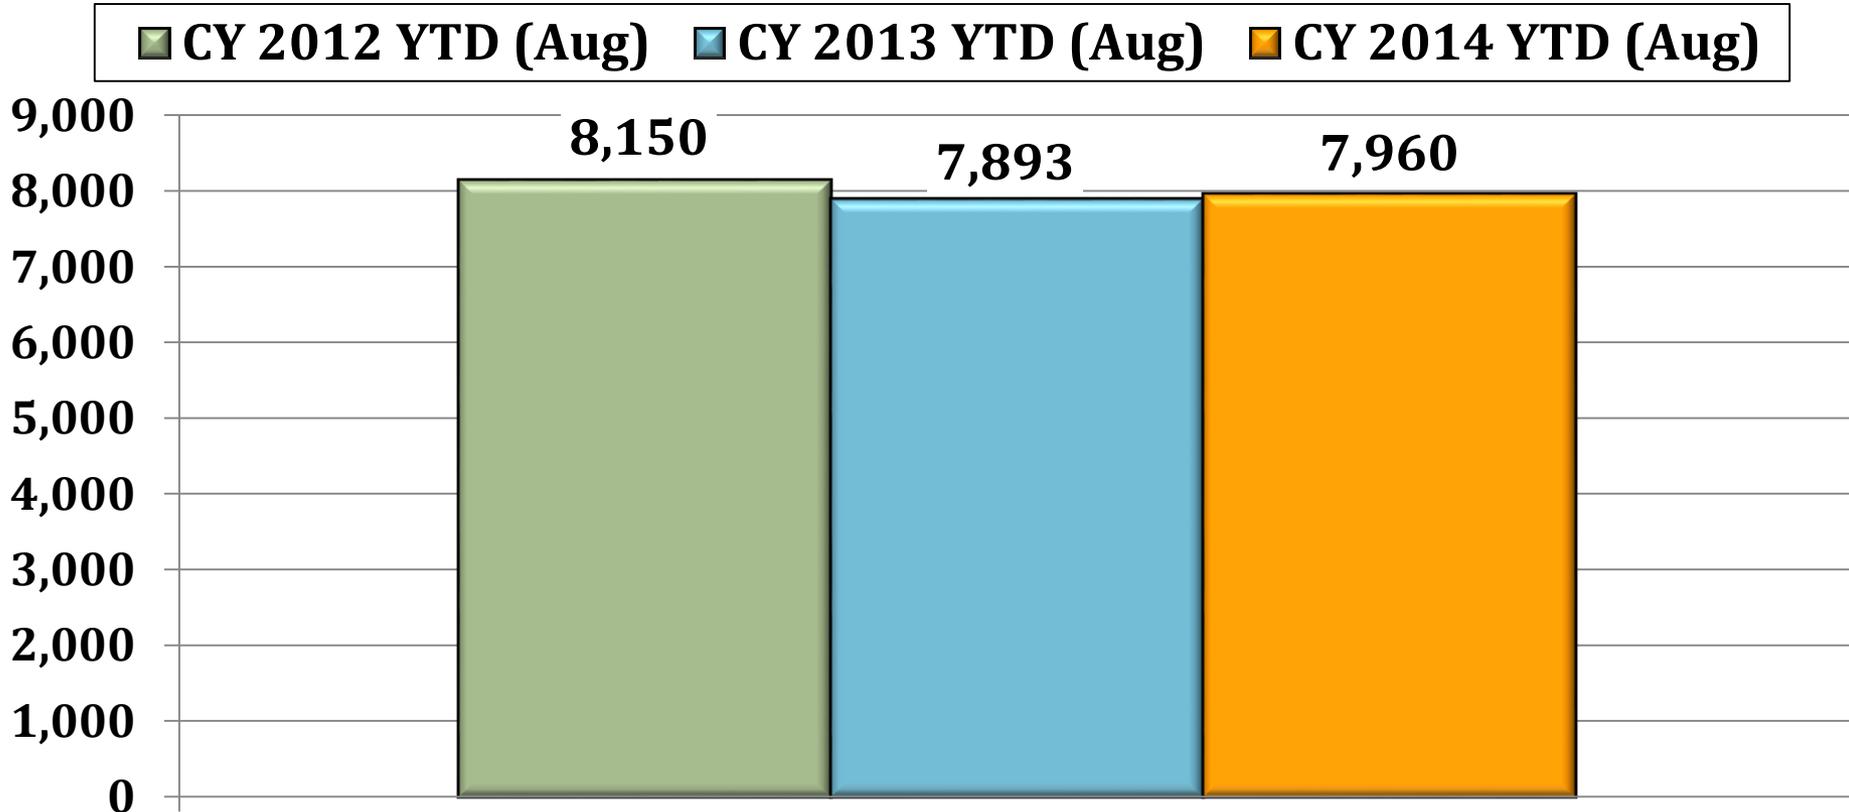

Crimes Against Persons by Location

Crimes against persons for calendar year 2014 year-to-date are mapped below. The color of each dot corresponds with the type of crime as described in the adjacent chart. *(data updated weekly)*

Explore the data

CRIMES AGAINST PERSONS CALENDAR YEAR-TO-DATE COMPARISON

Crimes Against Persons

Assault offenses make up overwhelming majority of crimes against person

Crime offense information is obtained from the NIBRS Data submitted to the State of Missouri (Group "A" Offenses)

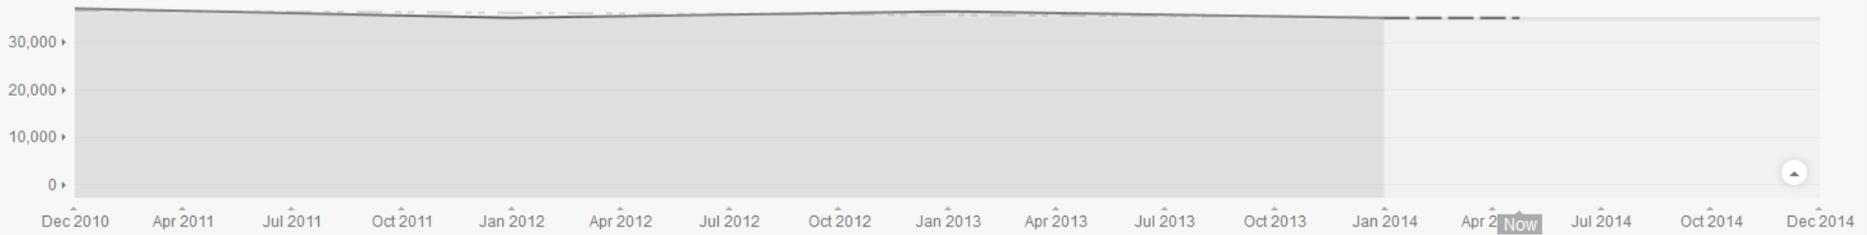

CRIMES AGAINST PROPERTY

Crimes Against Property

35,316

crimes against property in 2013

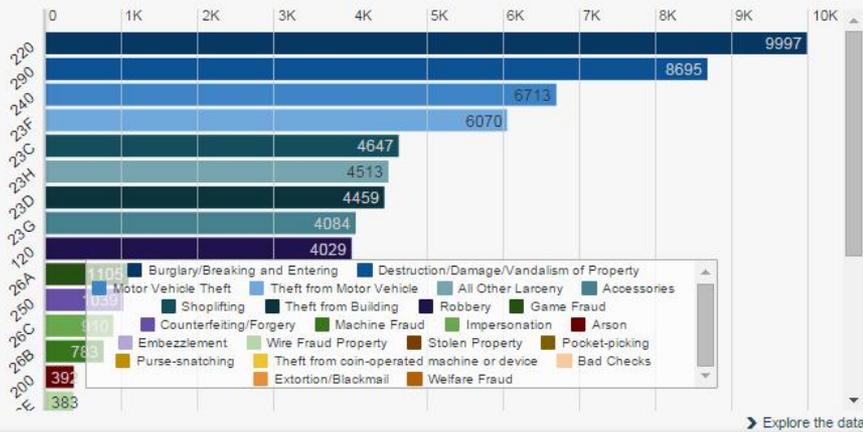

Another key measurement for this priority is the number of crimes against property. The target is a 5% decrease in the number of crimes against property from fiscal year 2013-14 (which ends April 30, 2014) to fiscal year 2014-15 (which ends April 30, 2015).

CRIMES AGAINST PROPERTY (2014 YEAR-TO-DATE)

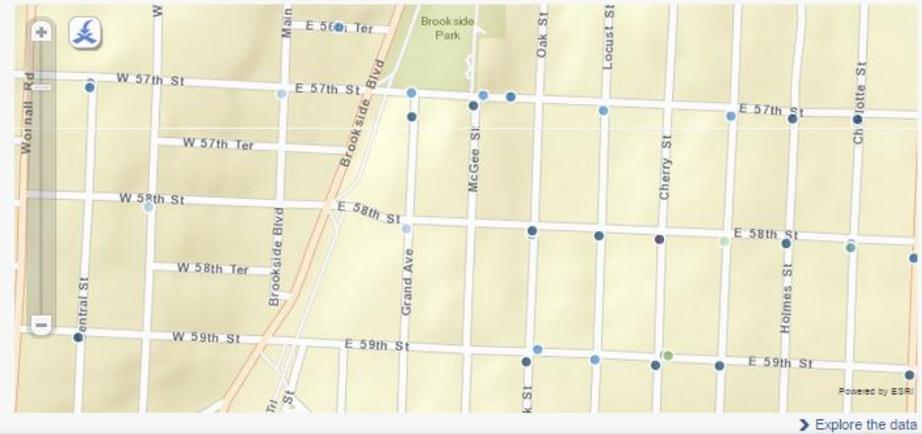

Crimes Against Property By Type

Crimes against property are each associated with a particular NIBRS code (described above), which is shown on the side of the chart below. The legend provides the description of each code. The chart below shows counts for calendar year 2014 year-to-date. *(data updated weekly)*

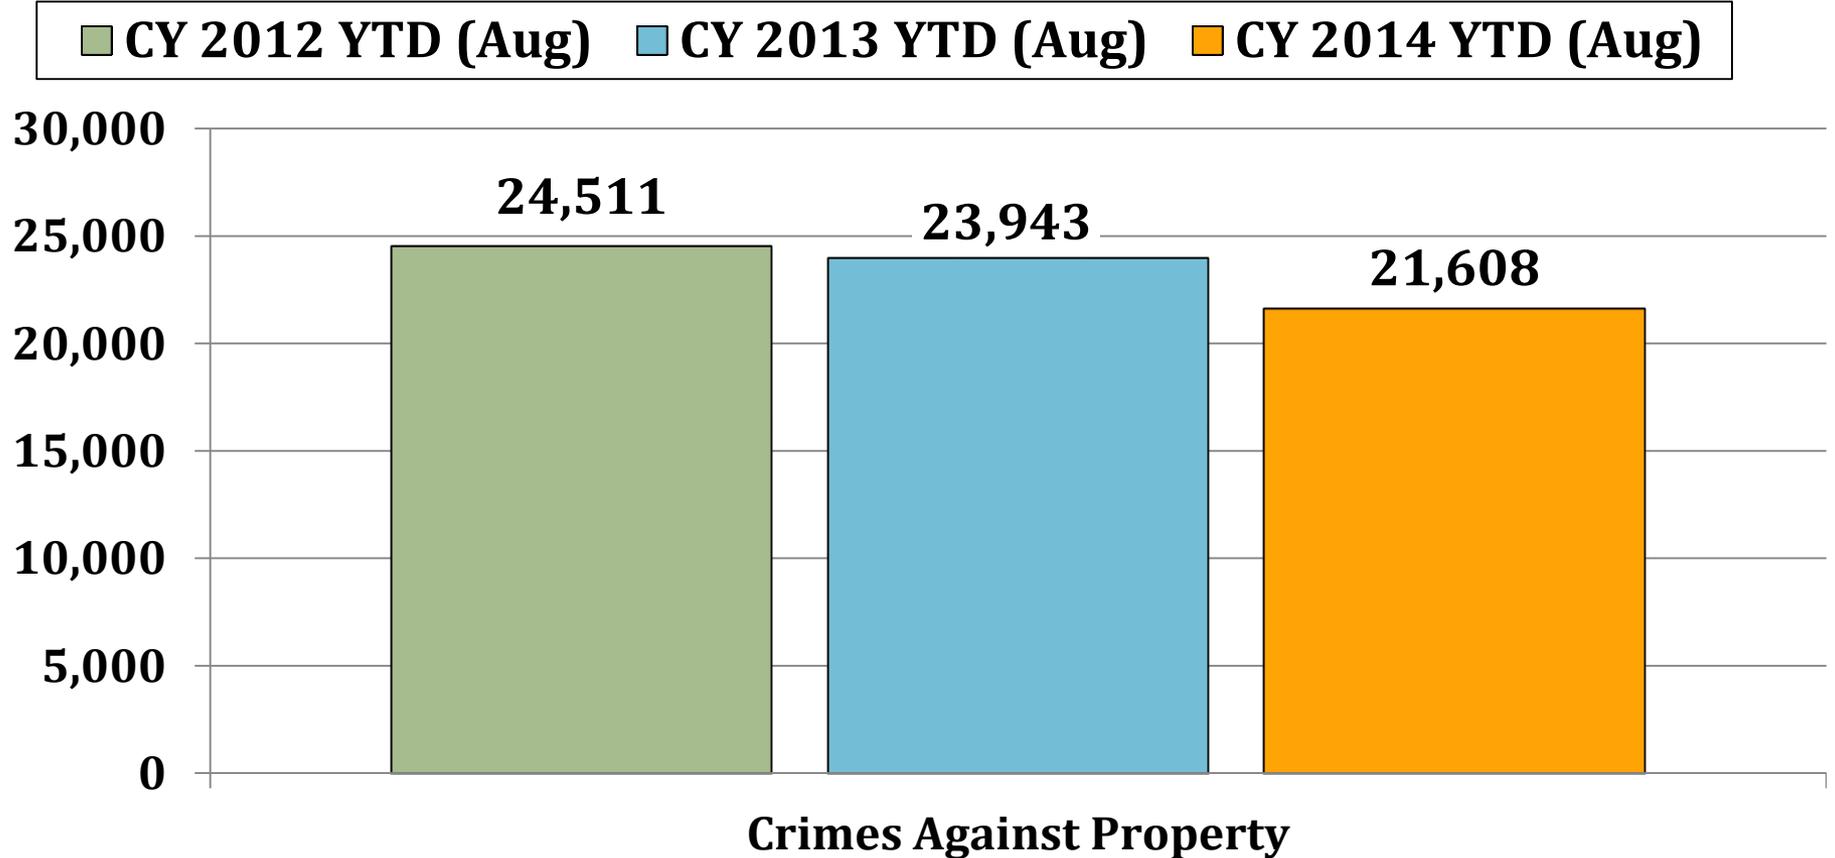

Crimes Against Property By Location

Crimes against property for calendar year 2014 year-to-date are mapped below. The color of each dot corresponds with the type of property crime as described in the adjacent chart. *(data updated weekly)*

CRIMES AGAINST PROPERTY CALENDAR YEAR-TO-DATE COMPARISON

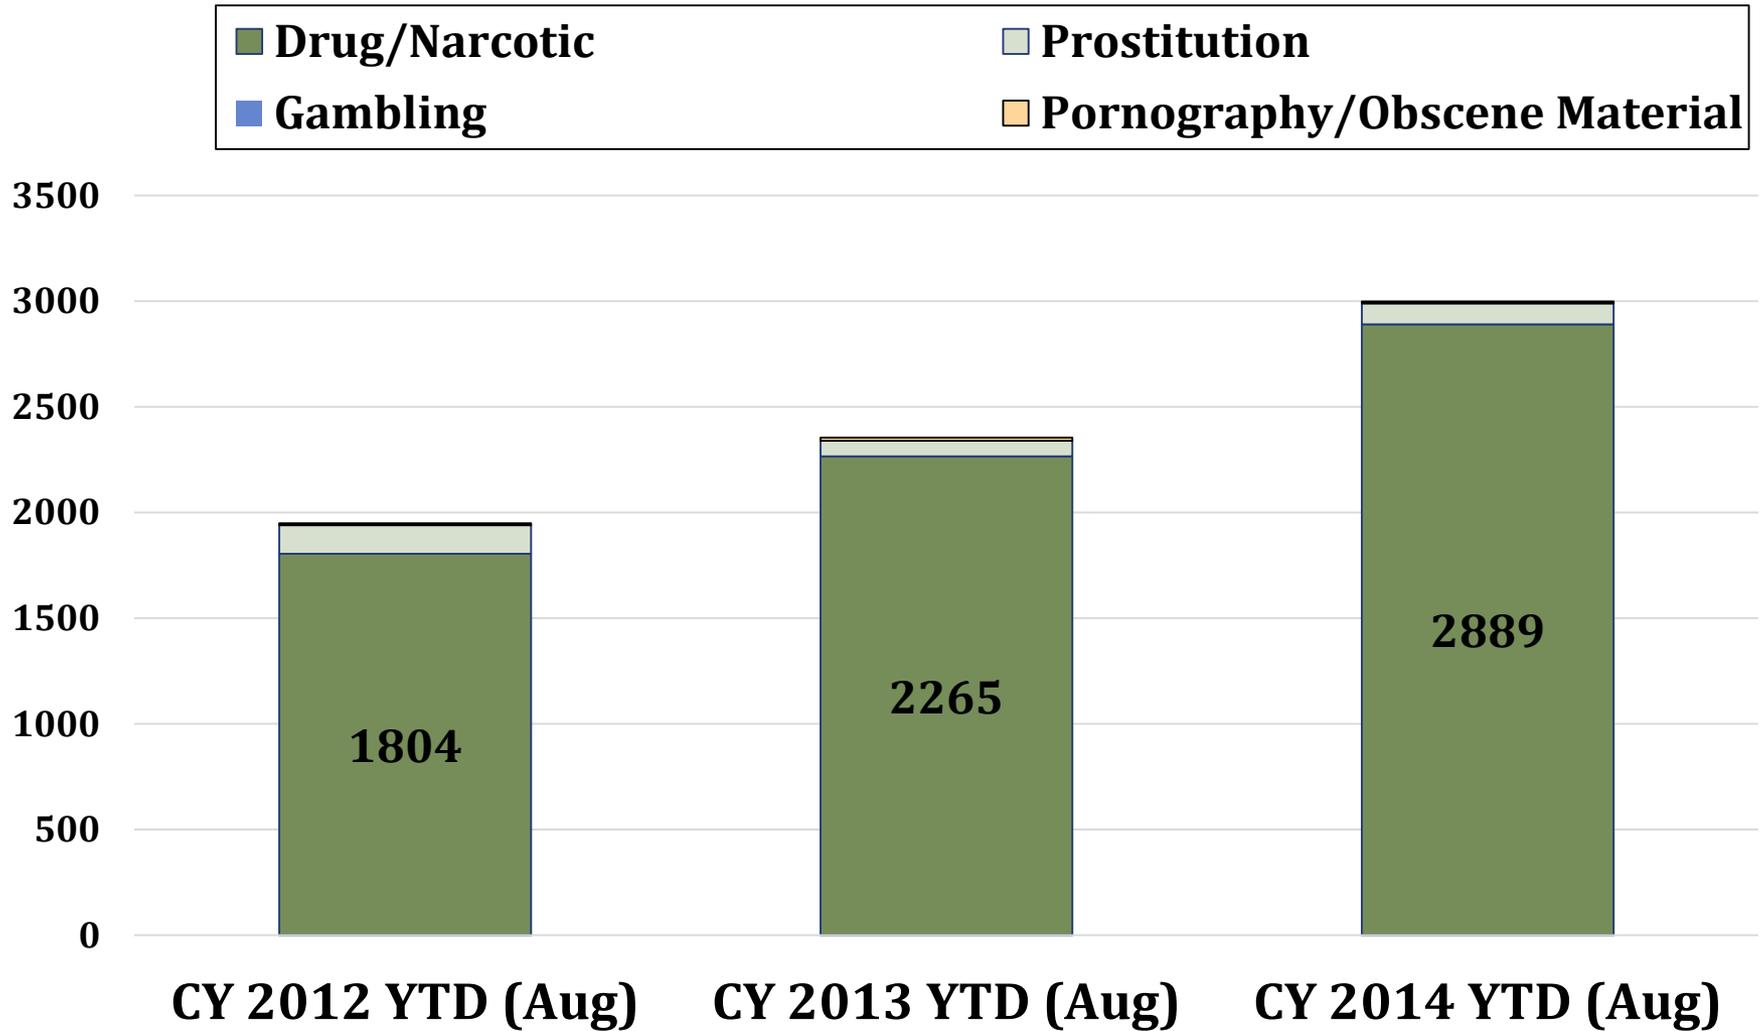

Crimes Against Property include:

Arson, Extortion, Larceny/Theft, Burglary/Breaking and Entering, Motor Vehicle theft, Fraud, Counterfeiting, Embezzlement, Stolen property and Damage/Vandalism

Crime offense information is obtained from the NIBRS Data submitted to the State of Missouri (Group "A" Offenses)

VICE CRIMES CALENDAR YEAR-TO-DATE COMPARISON

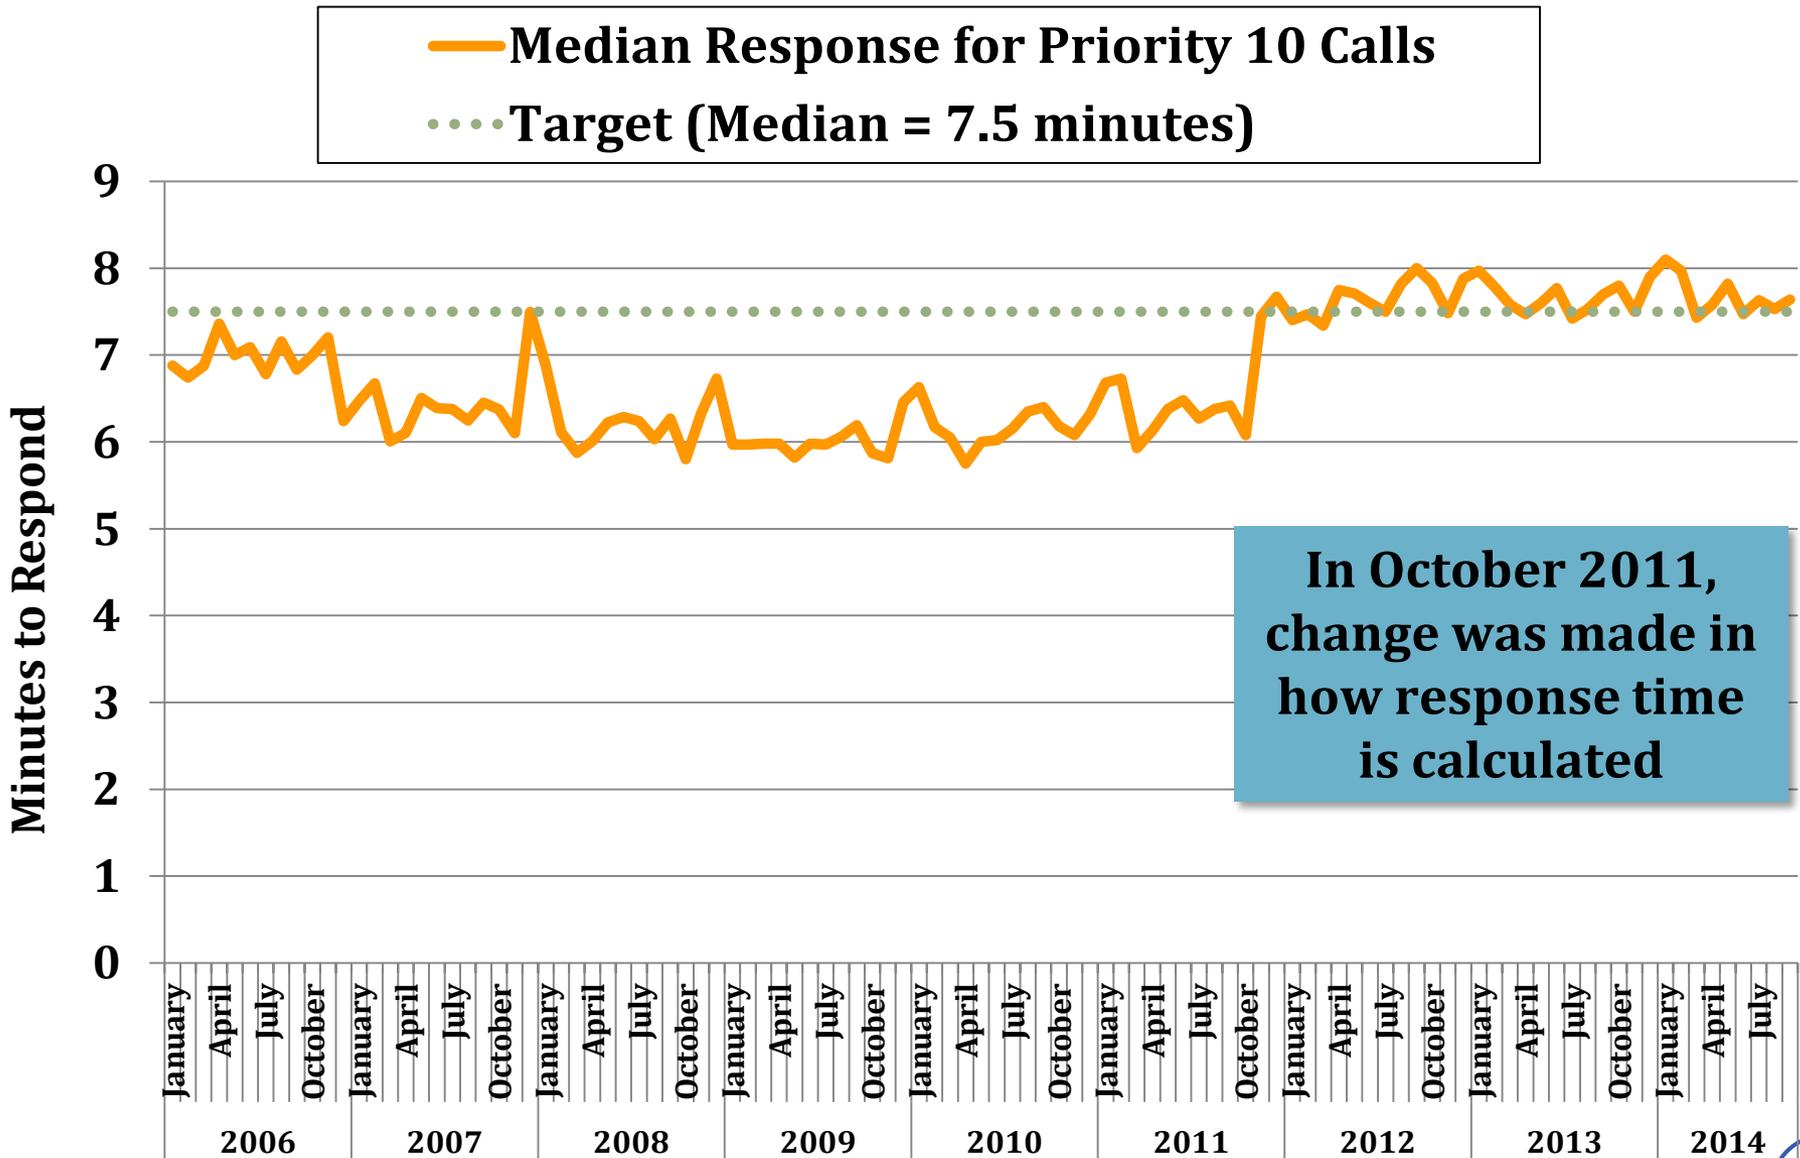

Crime offense information is obtained from the NIBRS Data submitted to the State of Missouri (Group "A" Offenses)

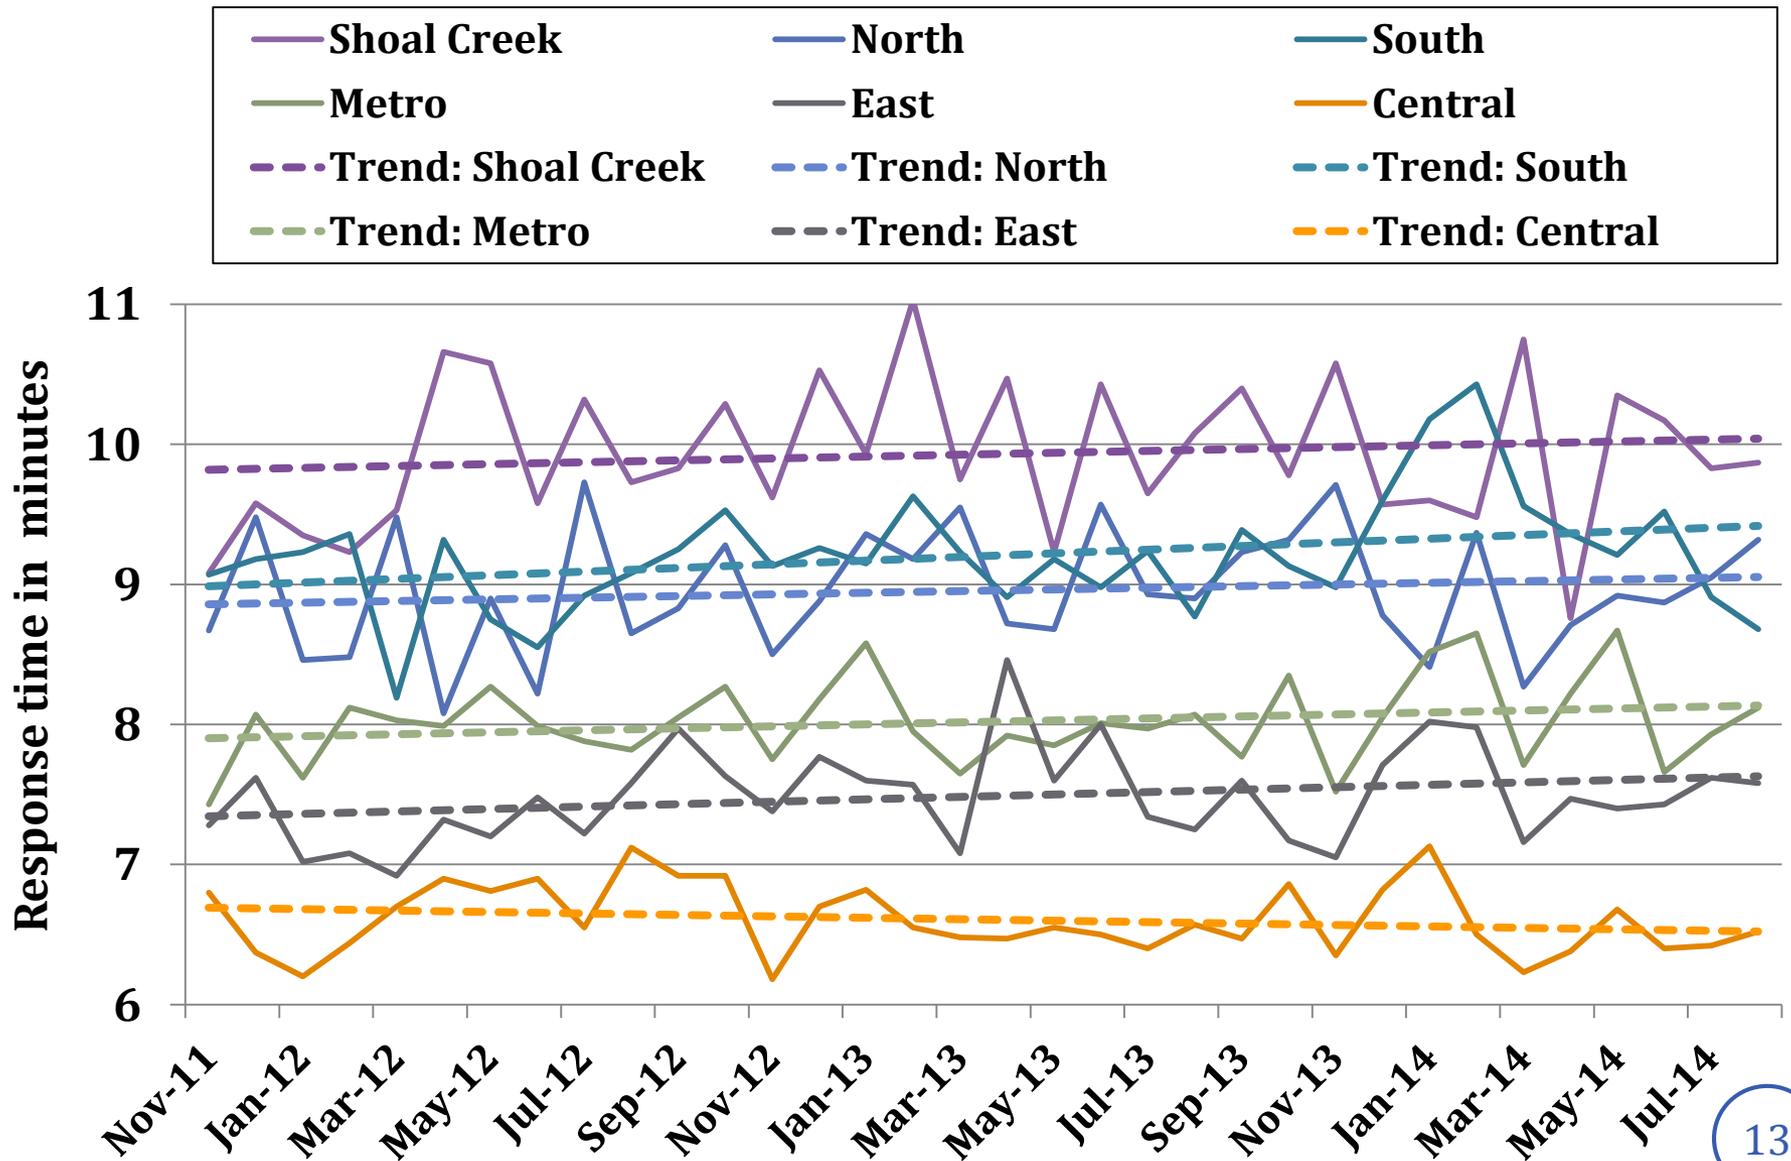

KCPD PERFORMANCE INDICATORS IN BUDGET

Indicator	Actual FY '13-'14	Target FY '14-'15	Target FY '15-'16
Crimes against Persons	9,864	5% decrease from Actual FY '13-'14	5% decrease from Actual FY '14-'15
Crimes against Property	34,498	5% decrease from Actual FY '13-'14	5% decrease from Actual FY '14-'15
Indicator: Crimes against Persons/Property committed by youth (under 25)	6,644 Total (2,629 against persons 4,015 against property)	5% decrease from Actual FY '13-'14	5% decrease from Actual FY '14-'15
Indicator: Median Response Time (In Minutes) For Priority 10 Calls for Service	7.40	7.5	7.5
Indicator: Traffic Enforcement Citations issued (Red Light (RL) Cameras were suspended 11/6/2013)	134,025	5% increase from Actual FY '13-'14 less RL camera	5% increase from Actual FY '14-'15 less RL camera

RESPONSE TIMES FOR KCPD

KCPD RESPONSE TIMES BY PATROL DIVISION

POLICE STAFFING AND DEPLOYMENT MODEL

- **Six Divisions w/ 24 hour staffing:** KCPD has six Patrol divisions operating on a 24 hour basis divided into three watches of differing size, creating a unique staffing scenario at each station.
- **Previously:** KCPD had no mathematical way to determine if officers were equitably distributed amongst the patrol division. New officer assignment was based on the total number of officers assigned to a division regardless if this met the minimum need for safe operation.
- **Critical Staffing:**
 - A patrol division, by watch, would buy back an officer on overtime so that minimum staffing levels were met for safe operations.
 - The critical staffing chart incorporates officer exception time (10% rule) and limited duty officers to visually identify staffing disparity. It focuses on the officers on patrol answering 911 calls for police service.
 - Assists in determination of recruit officer assignment, equitable distribution of officers among patrol division, decreases overtime, increases morale and provides for a safer working environment.

CRITICAL STAFFING AND DEPLOYMENT MODEL

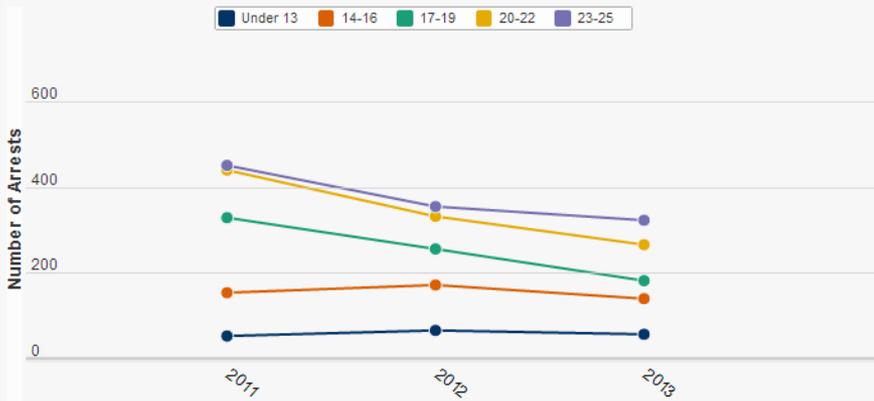

CPD		Actual # PO	10%	Pool	Off On R Day	Available Each Day	Avail. Each Day W/10% Off	Watch Set Minimum	Criticality
	W-1	38	3	5	12.6	20.4	17.4	15	86%
W-2	36	3	3	11.9	21.1	18.1	13	72%	
W-3	41	4	5	13.6	22.4	18.4	17	92%	
Division	115	10	13	38	64	54	45	83%	

YOUTH CRIMES AGAINST PERSONS AND PROPERTY

YOUTH AND CRIME IN KANSAS CITY

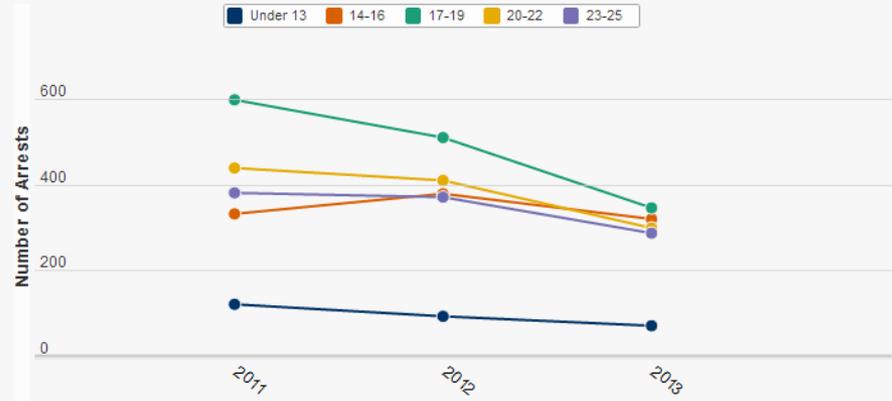

Youth Arrested For Crimes Against Persons

Unlike the crime reports above, this data reflects the age of individuals **arrested** for crimes against persons. The City defines "youth" as an individual who is under 26 years old. *(updated annually)*

Youth Arrested For Crimes Against Property

Like crimes against persons, this data shows the age breakdown of youth **arrested** for crimes against property. Arrests of older teenagers for crimes against property appear to be trending down over the last three years. *(updated annually)*

ADDRESSING VIOLENT CRIME IN
KANSAS CITY

KC NO VIOLENCE ALLIANCE

Kansas City No Violence Alliance (KC NoVA)

KC NoVA is a new, innovative initiative coordinated by the Kansas City Police Department that focuses on "interrupting" the cycle of violent crime by relying on partnerships with organizations providing social services, faith based services, probation and parole systems, law enforcement and family support groups. KC NoVA's goal is to reduce violent crime, especially homicides, in Kansas City's urban core. KC NoVA uses police intelligence and analysis to map the relationships among criminals. Key leaders in these mapped crime networks are invited, or "called in" to meet with KC NoVA leaders and partners, where they are asked to stay away from violence. Below is a photo of a recent call-in session, in which mothers of homicide victims explain the horror of losing a child because of a violent crime.

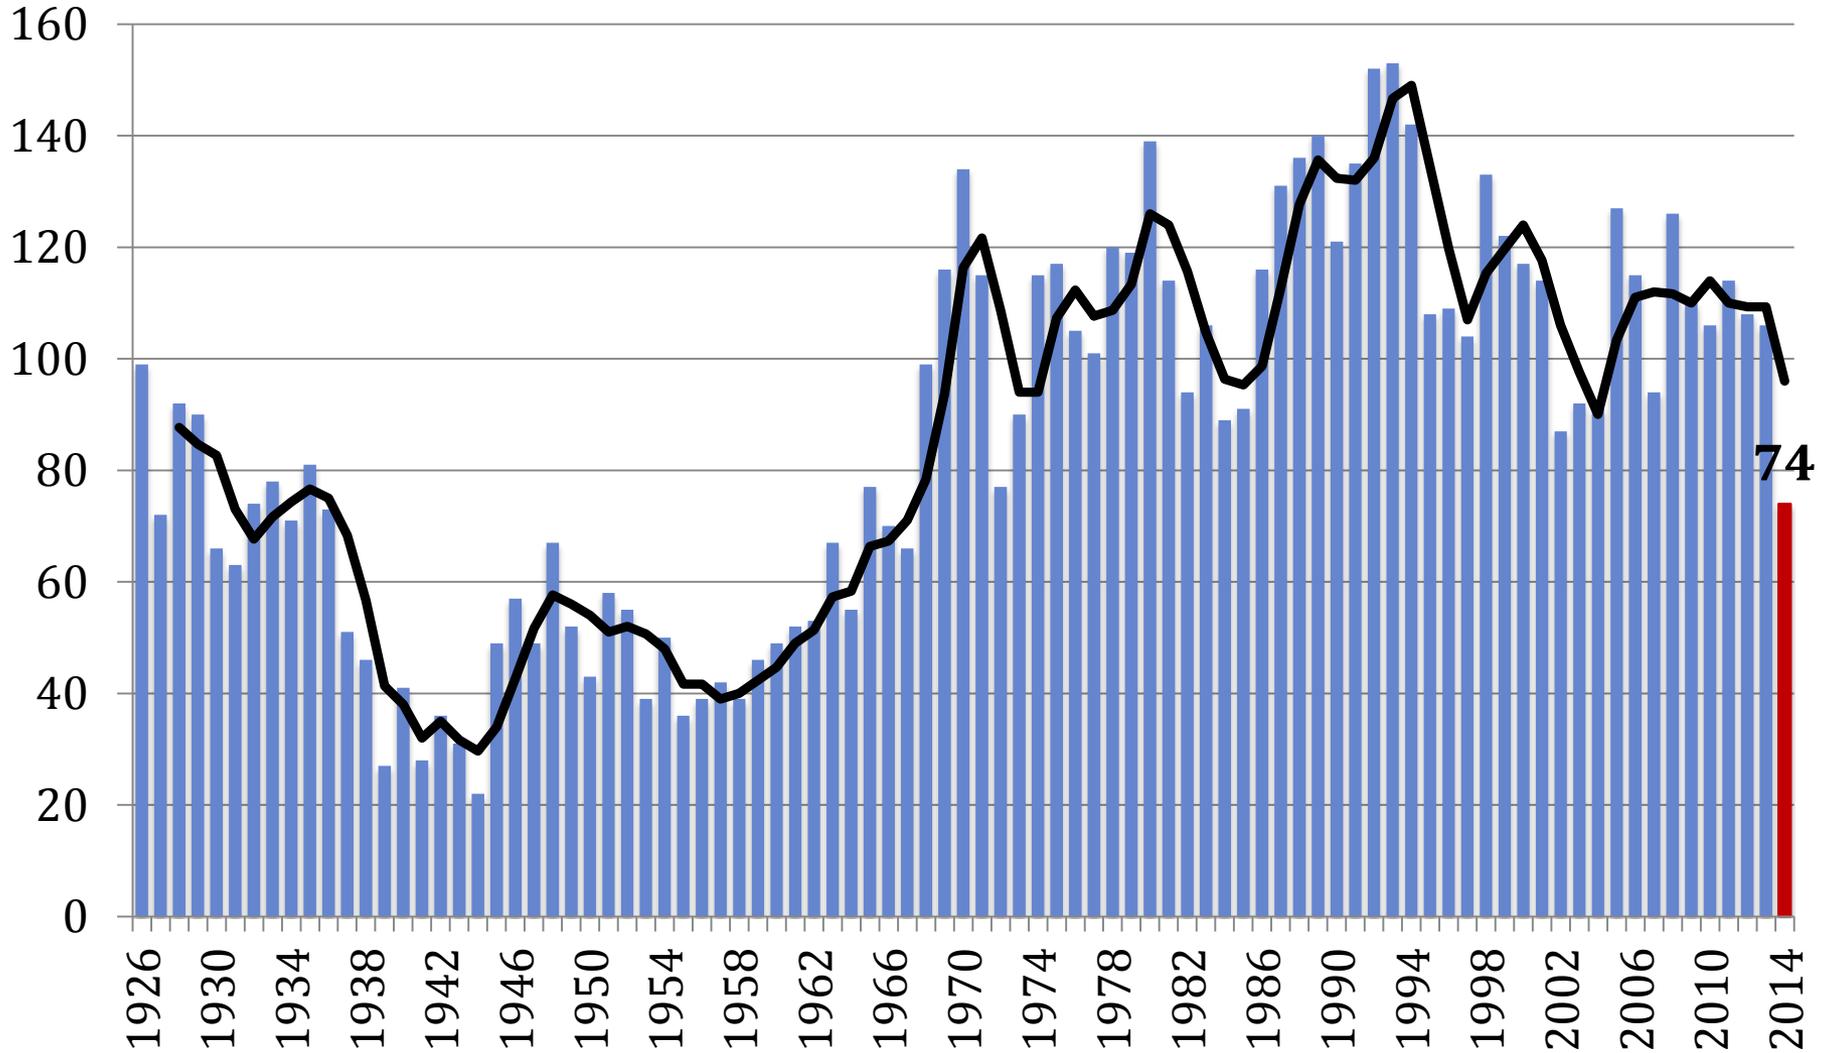

For more information about KC NoVA, visit:

http://youtu.be/OZLNJwM5_RQ

AIM4PEACE MEDIATIONS

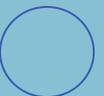

Aim4Peace Program

Aim4Peace is a Kansas City Missouri Health Department program that uses a public health model to prevent, disrupt and limit the spread of violence, especially retaliatory violence. Aim4Peace identifies individuals at high risk of becoming involved in violence and calls on a team of trained, community members to act as first responders who: 1) provide one-on-one case management and conflict resolution; 2) intervene in violent situations to broker peace and 3) appear at hospitals after penetrating injuries occur in order to prevent retaliatory violence. The program began in Kansas City in 2008 and is built upon the internationally acclaimed model Cure Violence (formerly Chicago CeaseFire). For more information about Aim4Peace, visit: <http://kc.mo.gov/health/aim4peace/>

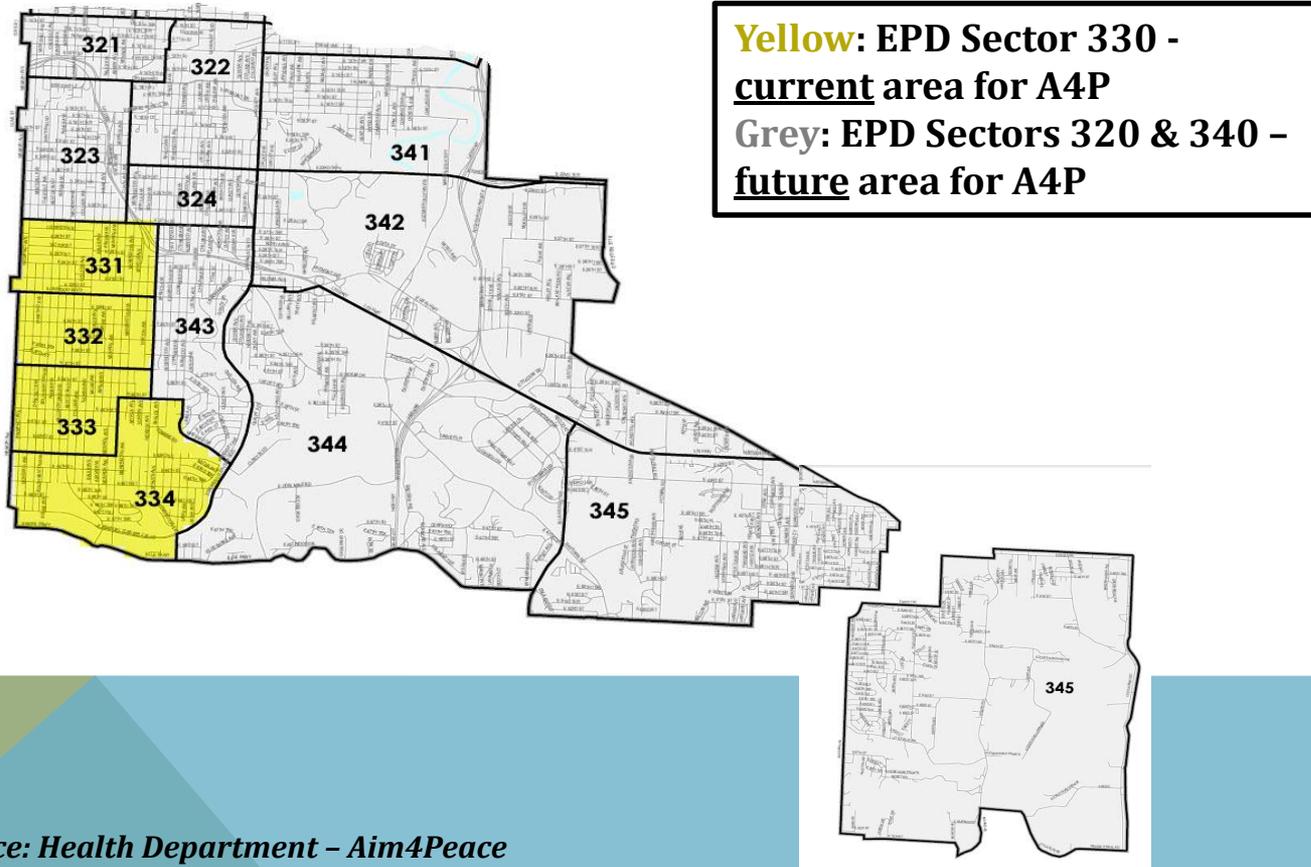

SCIENTIFIC APPROACH

1. Violence behaves like a *contagious disease (epidemic)*
2. *Treating* violence like an epidemic gets *results* in communities

AIM4PEACE SECTORS

Source: Health Department - Aim4Peace

We are focused on **prevention of gun-related violence** that is primarily related to arguments and retaliation in targeted areas of East Patrol, but we seek to expand to the entire Metro Area.

Show chart

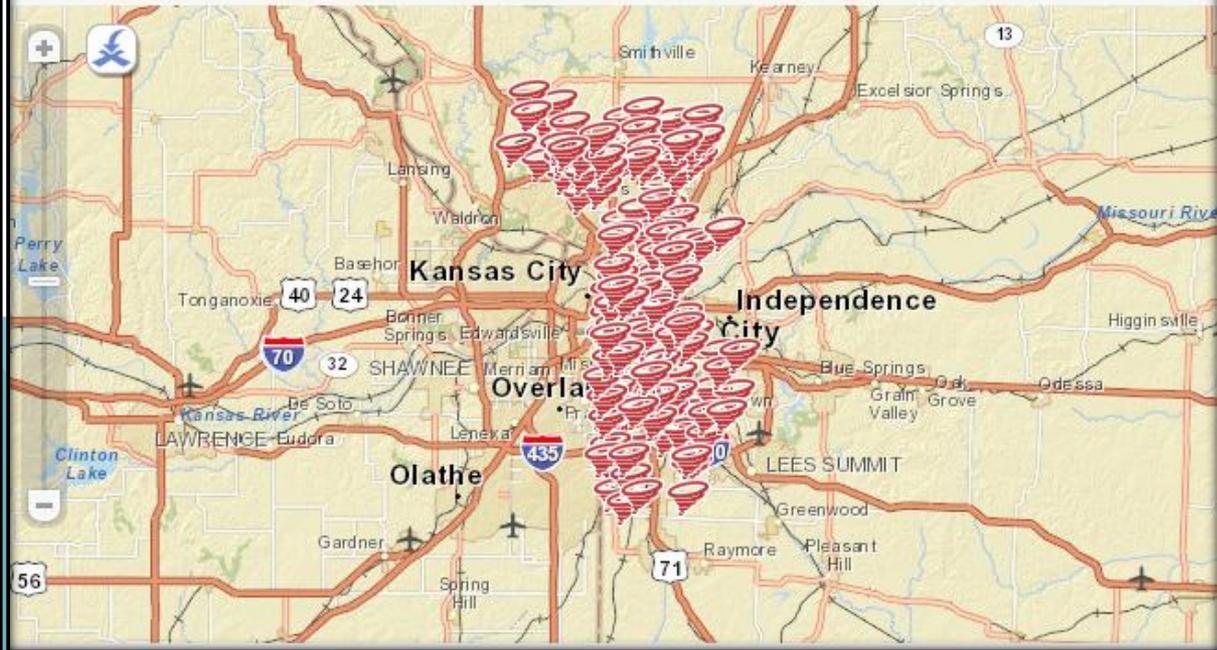

SIREN LOCATIONS

Tornado Siren Locations

The tornado siren system provides critical warnings to individuals that are outdoors and may be unaware of dangerous tornado conditions. Tests are run against the system on a daily basis; the system is also sounded in a test once a month, generally on the first Wednesday of the month. The system is not designed to be heard while indoors. It is recommended that citizens have an all-hazard radio for use indoors, particularly at night when most people are sleeping and not aware of imminent danger.

To learn more about all-hazard radios, visit:

EMERGENCY OPERATIONS CENTER (EOC)

EOC ACTIVATIONS AND SITUATION MONITORING HOURS

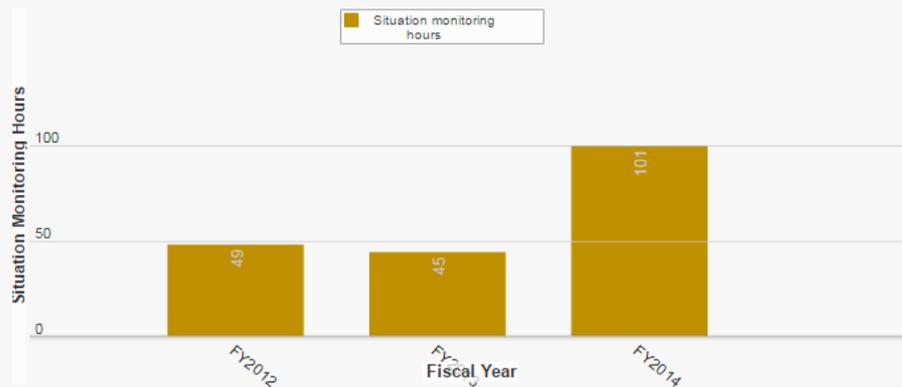

Emergency Operations Center Activations

The Emergency Operations Center's purpose is to provide a place for response agencies to collocate during an emergency to facilitate coordination, communication, cooperation, and collaboration. Through backup systems and technology, the EOC remains functional when other facilities become non-operational. Once the EOC is activated, staff provides support and guidance to emergency responders and serves as the communication hub between local, county, state and federal entities.

Situation Monitoring Hours

Office of Emergency Management staff at the EOC provide the critical function of monitoring potential incidents, particularly those that are weather-related, to determine if and when emergency response agencies are needed. Monitoring also occurs on small incidents that have the potential to escalate to a level that would require the advanced coordination that EOC activations provide.

OUTREACH AND TRAINING

Emergency Preparedness Training and Outreach Efforts

The City's Office of Emergency Management is committed to not only helping prepare the city for an emergency, but also giving individuals the tools to care for their own families and neighbors in the event of a natural or man-made disaster. Staff from OEM actively participate in outreach events to educate residents, businesses and neighborhoods about proper preparedness techniques.

In addition, residents are encouraged to take advantage of the free Community Emergency Response Team (CERT) training offered by the Office of Emergency Management. CERT training takes about 20 hours and includes classroom and practical experience that helps prepare individuals for emergencies and disasters they may face. To learn more about CERT training, visit:

<http://kcmo.gov/citymanagersoffice/community-emergency-response-training/>

LOCAL EMERGENCY OPERATIONS PLAN UPDATE

The Local Emergency Operations plan provides general guidance to City agencies and its partners in preparing for, responding to and recovering from the effects of natural and man-made emergencies and disasters.

- **This was a 21 month process that involved stakeholders from local, regional, state, and not-for-profit partners.**
- **New sections added include:**
 - Annex O – Catastrophic Incidents**
 - Annex Q – Emergency Pet Services**
 - Annex R – Debris Removal**
 - Hazard Specific Response Plan for Severe Thunderstorms and Tornadoes**
- **Additional updates addressed ADA/DOJ compliance issues.**

Local Emergency Operations Plan
September 2014

IMPROVE EMERGENCY MEDICAL RESPONSE AND PATIENT OUTCOMES

RESPONSE TIMES

ALS AND BLS RESPONSES

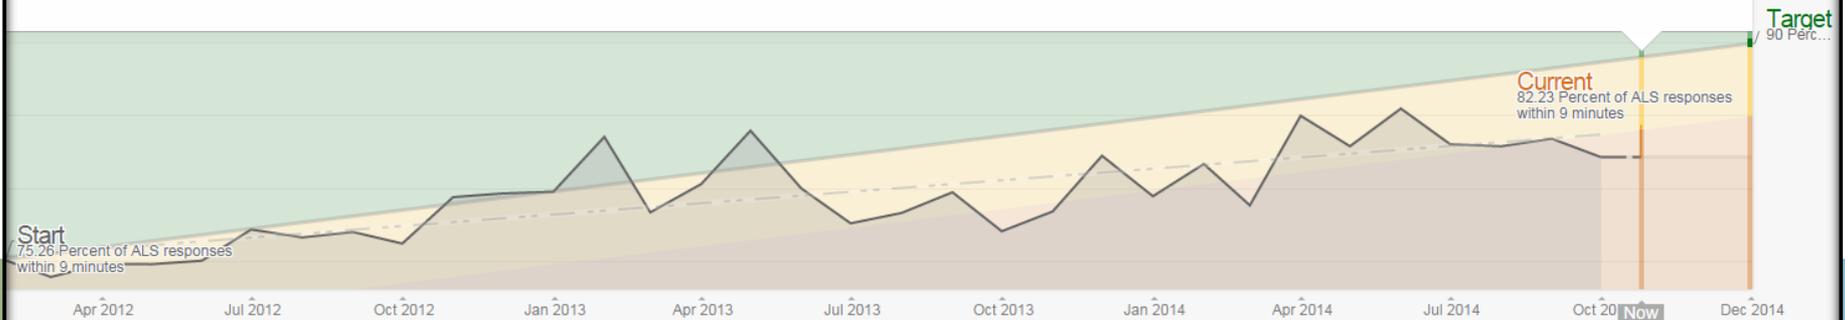

Kansas City will improve EMS response time and patient outcomes.

The key measurement for this priority is the time to respond to life-threatening emergencies with advanced life support (ALS), which includes a paramedic who can administer medication. The target for this measurement for the city as a whole is that 90% of life-threatening emergencies have an ALS response within 9 minutes of the 911 call. [Explore the data](#)

PATIENT OUTCOMES

PATIENT OUTCOMES FROM EMS CARE: RETURN OF SPONTANEOUS CIRCULATION (VF/VT ONLY)

Patient Outcomes

Although a rapid response to life-threatening emergencies is an important component of emergency medical operations, the ultimate desired outcome is the survival and well-being of the patient. While there are many factors involved in this outcome beyond the EMS response, it is important that the EMS staff administer the correct medical protocols in an effective way.

One measurement of patient outcomes that is tracked across cities and communities is the return of spontaneous circulation after a cardiac event (also called ROSC). Signs of ROSC include breathing/coughing/movement and pulse/blood pressure. ROSC is more likely to occur after a cardiac arrest with a "shockable" rhythm such as ventricular fibrillation (v-fib) or ventricular tachycardia (v-tach). The measurement below shows the percent of cardiac arrest patients with v-fib or v-tach rhythm that experience ROSC after EMS response. The city's target for this measure is 20%, which is being met consistently over time.

CARDIAC ARREST SURVIVABILITY BY CATEGORY

Cardiac Arrest Category	2008	2009	2010	2011	2012	2013	2013 Nat'l Avg	2014 YTD

FIRE RESPONSES AND FATALITIES

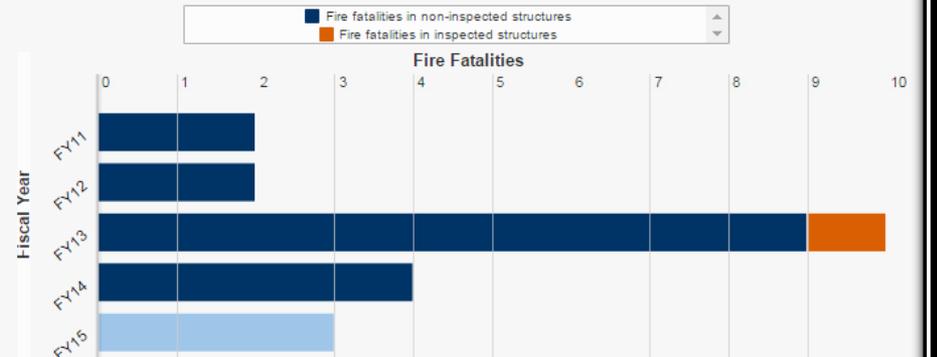

Fire Responses

The below data includes responses for apartment, house, high rise, building, regular alarm, working fire, out building, car, dumpster, and grass fire call types. The total volume is fairly consistent from quarter to quarter. *(data updated quarterly)*

Fire Fatalities

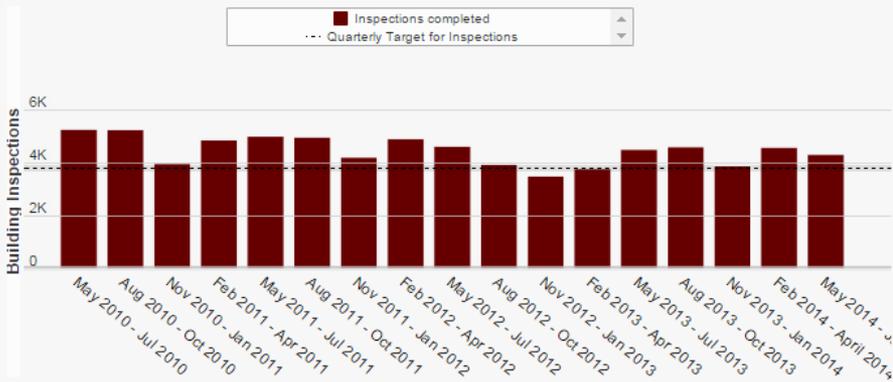

Fire fatality data is split into two categories: fire fatalities in inspected structures and fire fatalities in non-inspected structures. Inspected structures include commercial and industrial buildings, as well as multiplex residential buildings; there has been only one fire fatality in an inspected structure in the last four fiscal years. *(data updated annually)*

FIRE PREVENTION ACTIVITIES

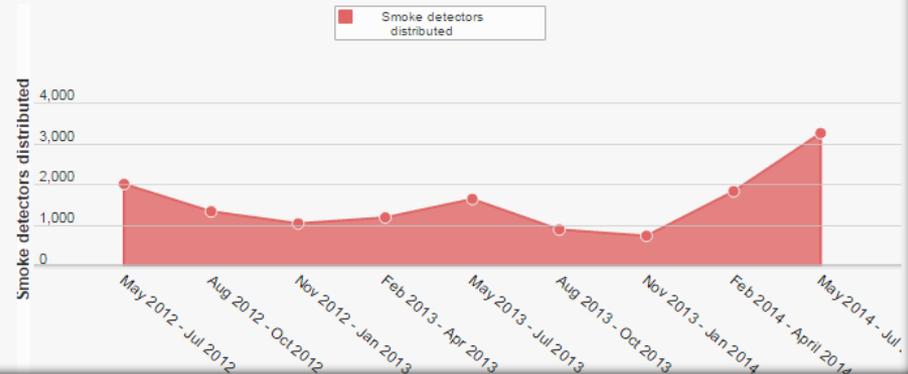

Building Inspections

Commercial, industrial, and multi-family residential buildings must be inspected to ensure adherence to the city's fire code. KCFD's annual target is 15,000 inspections, which has been met for the last 3 fiscal years. *(data updated quarterly)*

Smoke Detector Distribution

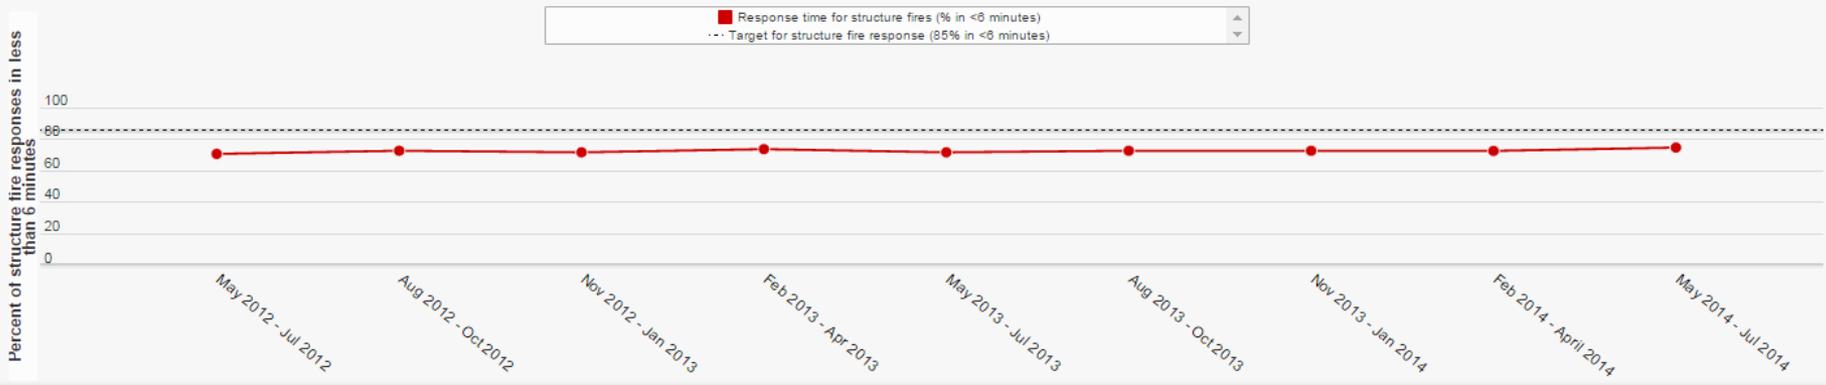

KCFD distributes thousands of free smoke detectors each year. By working in partnership with safety net agencies, KCFD can target demographic groups that are most at risk for not having a working smoke detectors. Smoke detectors that are currently being distributed have a tamper-proof lithium battery with a 10-year lifespan. *(data updated quarterly)*

FIRE RESPONSE TIME

Response Time

In the case of fire, reliable responsiveness is important to reduce the loss of property and life. The city has 34 fire stations spread throughout the city (for a full list, see here: <http://kcmo.gov/fire/about-2/#tab-firs3>). The department's target for response time for fire responses is that 85% of responses arrive in less than 6 minutes. (data updated quarterly)

Final Thoughts or Questions?
